FIG. 7A

The diagram illustrates a cross-sectional view of a curved surface. A central vertical dashed line serves as a reference axis. At the top, two curved surfaces are shown, each with a dashed line passing through its center. The angle between the tangent to the curve and the dashed line is labeled $\alpha''/2$. A horizontal dashed line is labeled 90. Below this, a shaded, irregularly shaped region is labeled 94. At the bottom, another curved surface is shown, labeled 96, with a dashed line passing through its center. The angle between the tangent to the curve and the dashed line is again labeled $\alpha''/2$.
